

MARKET INTELLIGENCE CATALOG

WHO WE ARE

Science and Medicine Group supports companies seeking to commercialize the rapidly changing marketplace at the intersection of science, medicine, and technology. Comprised of industry-leading brands, Science and Medicine Group serves analytical instrument, life science, imaging, and clinical diagnostics companies by helping them create strategies and products to win markets and provide platforms to engage their markets through a variety of innovative solutions.

Kalorama Information is a leading publisher of market research in medical markets, including the **biotechnology, diagnostics, medical device, and pharmaceutical industries**. Our comprehensive, timely research and innovative approach to analysis and presentation of market intelligence have made Kalorama Information a premier source of information for top industry decision makers.

Strategic Directions International (SDi), is a trusted provider of market analyses in the **analytical and life sciences instrumentation industry**. Publishers of the industry-renowned Global Assessment Report and Instrument Business Outlook (IBO) publication, the SDi analyst team has decades of experience in both market research and in laboratory settings. SDi understands both the market and the technologies studied.

IMV is a recognized leader in market research and online publishing for the **medical imaging and clinical diagnostics markets**. IMV also offers media properties including Aunt Minnie, the leader in online medical imaging news and radiology CME, and Dr. Bicuspid, the fastest growing dental news and CE digital property.

Bioinformatics Inc., founded in 1994, is a research and advisory firm serving companies in the **life science**, analytical instrumentation and diagnostics industries for 20+ years. By leveraging our online professional network of nearly 100,000 scientists, The Science Advisory Board®, Bioinformatics has supported 500+ companies by providing insights that lead to better business decisions.

WHY A COMPREHENSIVE SUBSCRIPTION PLAN?

Save Costs

**Get a 75% discount
on every title's list price**

With a subscription plan that is most relevant to your business, you receive the best possible price on all reports.

Multi-year subscriptions lock in current prices — saving you even more money over time.

Save Time

**Gain back over two work
weeks each year***

*The usual back and forth of requesting and receiving sample pages, combing through tables of contents, and confirming reports have the data you need could take 1-2 hours of work on each title. A comprehensive subscription potentially could save you weeks for all titles

All historical reports are accessible at the touch of a button and all new reports are instantly accessible the moment after they publish

Save Peace of Mind

**Access more knowledge
with less administration**

Quickly add other users, or become the main source of information and industry knowledge for all of your colleagues.

Instead of keeping track of new releases and ordering research multiple times each year, simply renew one contract at the same time each year.

Fulfill urgent or specific requests with intelligence covering every area of the market, eliminating knowledge gaps

INTERESTED IN A SUBSCRIPTION?

Please contact us at **reports@scienceandmedicinegroup.com** or give us a call at **703-783-1710**.

Our experienced team of published market research professionals are happy to discuss what content would make the most sense for your needs, and to develop a solution and price quote customized for your business.

For purchase of individual reports, you can either contact us at the information above, or visit **scienceandmedicinegroup.com** for a list of our publishing brands' websites.

SUBSCRIPTION OPTIONS

Analytical Instrumentation

This content category provides comprehensive market information on 82+ analytical instrumentation technologies, including benchtop laboratory systems, portable instrumentation, and stand-alone instruments used to make analytical determinations. The content provided in this subscription category also covers process instrumentation products and lab software. Ultimately, these reports cover a wide range of topics, such as developed and emerging regional markets, a diverse number of applications from life

science to oil and gas, and detailed analysis of specific product categories, such as HPLC or mass spectrometry. In addition to accurate market size and growth data, many of these reports also include end-user perspectives from sizable market-related surveys covering laboratory budgets, vendor satisfaction, future purchasing plans, and more.

Life Science

One of the broadest content categories we offer, our life science market and survey reports supply a broad swath of valuable information. In addition to covering the markets for all analytical instruments used in life science research, subscribers also receive survey-based reports with valuable voice-of-the-consumer data covering life science marketing and sales strategies. These reports examine the opinions and preferences of scientists on many different areas of the customer experience, from supplier discovery and

awareness, through the purchasing process and post-purchase support. This combination of market and survey data helps subscribers at both the strategic corporate development level and on a more tactical department level.

Diagnostics

This content category covers many different products, such as molecular assays, immunoassays, point-of-care tests and instruments, infectious disease testing, clinical chemistry, microbiology, virology, lab testing services and providers, associated reagents and clinically-approved instrumentation, and more. Market size and forecasted growth are provided for each information area, as well as detailed information about each market's history and future trends. Most reports include detailed vendor profiles of both

major and minor market players, so subscribers can have a thorough understanding of every aspect of the diagnostics industry.

SUBSCRIPTION OPTIONS

Healthcare, Digital Health, and Medical Devices

The term “Healthcare” covers many different industries, but this content category focuses on select markets that are seeing the most innovation, upheaval, and transformation. With titles focused on Artificial Intelligence in healthcare, the rise of retail clinics, and connected devices in the Internet of Things, subscribers will be able to understand where the healthcare market has been, where it is now, and where our team of experienced industry analysts expect it to be in the future. Medical Devices is an area that our analysts have also covered for many years, and is included in this content category due to its close relation with the larger healthcare market, such as out-of-pocket expenses and long-term care.

Imaging

This content category covers worldwide trends in all major modalities of medical imaging: CT scanners, MR scanners, PET scanners, NM cameras (SPECT-only and SPECT/CT), fixed C-arm systems, fixed general X-ray systems, radiographic fluoroscopy (RF) systems, and more. With almost every report pulling data from a survey of hundreds to thousands of responding imaging centers, subscribers gain access to opinions about the key issues affecting imaging department priorities, challenges, and opportunities. Key

topics covered in this category include the relative distribution of the imaging equipment installed base across global regions, manufacturer presence, service satisfaction, purchase plans, total procedure volume, and more.

Biopharmaceuticals and Pharmaceuticals

The pharma industry has seen important developments recently, bringing both challenges and new opportunities. The industry outlook for many manufacturers has changed due to outsourcing in drug discovery, growing generic competition and greater interest in biotechnology, among other developments. Our reports provide the sales data, revenue forecasts, and competitive analysis that subscribers need to understand this changing market. Also included are reports covering analytical instrumentation

used in drug discovery, production, and quality assurance.

ANALYTICAL INSTRUMENTATION

	GLOBAL REPORT		
	20-001  The 2020 Global Assessment Report: The Analytical and Life Science Instrument Industry The “gold standard” of market research in the analytical and life science industries. This report features detailed market analysis and growth rates for more than 80 instrument technologies or-organized into ten technology categories. Each instrument/technique includes data and discussion of market segmentation by product, industry, function, and region. This is the one report relied upon by every major analytical instrument manufacturer. Pre-orders and subscribers will receive their copy and online access immediately upon the report’s release.	2/28/20	\$20,000
	20-002  2020 Global Quarterly Datastream The Global Quarterly Datastream provides data updates at the end of each financial quarter throughout the year, including important data regarding currency effects and estimation of organic growth. Purchasers receive four installments of data, with the final Quarter’s numbers delivered at the beginning of 2021. Only available to buyers of the 2020 SDi Global Assessment report (20-001).	3/15/20	\$10,000
	20-004  Instrument Installed Bases (Instrument Categories Following the Global Assessment) For companies involved in the life science and analytical instrumentation industry, it is important to understand how many systems are currently active in the world, as laboratories are also customers for consumable items and services. As systems are retired, the installed base provides opportunities for replacement sales or additional placements as desired throughput increases. This report provides data on the total installed base aligned with the technologies considered in our SDi Global Assessment Report, segmented by region, and supplemented with information on current unit shipments and the general market outlook.	4/15/20	\$6,000

ANALYTICAL INSTRUMENTATION

REPORT #	TITLE	PUBLICATION DATE	CORPORATE LICENSE PRICE
20-007	 Market Opportunity Report - Environmental Evolving environmental testing regulations continue to alter the landscape for environmental testing and the market for laboratory tools that serve these needs. This market report details specifics about the environmental testing industry, including opportunities and threats facing it from the perspective of instrumentation vendors. Market size and growth for various instrumental techniques is also provided, along with relevant segmentations and vendor share data.	4/20/20	\$6,000
20-008	 Application Area Market - Petrochemical/Chemical The chemicals and petrochemicals industry now represent more than \$1 trillion in annual sales, and these industries are enabled by laboratory testing for product development and quality control. This market report details specifics about the chemicals industry, including opportunities and threats facing it from the perspective of instrumentation vendors. Market size and growth for various instrumental techniques is also provided, along with relevant segmentations and vendor share data.	5/15/20	\$6,000
20-006	 Service Contract Markets for Lab Instrumentation Successful life science and analytical instrumentation vendors have found that service can become an important profit center. Beyond service contracts and maintenance, there are additional service offerings for validation, qualification, calibration, and training. This report sets out the market demand for these services across the industry, and includes a large-scale survey to probe satisfaction with specific vendors as well as the unmet needs and pain points customers face.	7/15/20	\$12,000
20-009	 Application Area Market Opportunity Report - Food Safety Food safety and quality is a major focus of the agriculture, food, and beverage industry globally. Laboratory instrumentation is an important part of the solution to these issues for the industry. This market report details specifics about the food & beverage industry, including opportunities and threats facing it from the perspective of instrumentation vendors. Market size and growth for various instrumental techniques is also provided, along with relevant segmentations and vendor share data.	7/15/20	\$6,000
20-005	 Mergers and Acquisitions in Instrument Companies The life science and analytical instrumentation industry remains a hotbed of acquisition, divestment, and merger activity. This report encapsulates the results of the past year, providing financial details wherever they are public. General trends and drivers are described, as well as notes on the strategies of the most active players and investors in the market.	8/15/20	\$4,000
20-011	 Application Area Market Opportunity Report - CROs Many major industries find it advantageous to outsource their analytical testing requirements. Foremost among them is the pharmaceutical industry, making the CRO market an important one for instrument suppliers. This market report details specifics about the contract research industry, including opportunities and threats facing it from the perspective of instrumentation vendors. Market size and growth for various instrumental techniques is also provided, along with relevant segmentations and vendor share data.	10/15/20	\$6,000

ANALYTICAL INSTRUMENTATION

REPORT #	TITLE	PUBLICATION DATE	CORPORATE LICENSE PRICE
19-013	 The 2019 Market for Live Cell Imaging Products Live cell imaging is the study of living cells using time-lapse microscopy and an increasingly popular technique for understanding cellular dynamics. Live cell imaging relies upon microscopes, cell analyzers, and image-capture devices and a wide variety of kits and consumables.	12/19/19	\$10,000
19-012	 The 2019 Market for Analytical Instruments Used in Water Testing Water quality is an issue not just for drinking water and agricultural uses. Many industries rely on water in their manufacturing processes and it must be continually tested for a variety of chemical, physical and microbial characteristics. The increased regulations surrounding water quality are driving demand for analytical instruments and this report highlights the growth by technology, market segment and region.	11/19/19	\$12,000
19-007	 The 2019 Electron Microscopy Market This report covers scanning electron microscopes (SEM), tabletop SEM, transmission electron microscopes (TEMs), focused ion beam and dual beam systems, energy dispersive (EDS) and wavelength dispersive (WDS) X-ray analyzers, aftermarket components and consumables. The report provides information on the market size in 2018, growth forecasts over the next five years and the results of an end-user survey.	10/19/19	\$10,000
19-011	 Instrumentation Companies Market Shares and Analysis Report One of the most important ways of viewing the marketplace, both for market participants and for external investors and other observers, is through the competitive situation. To get a complete picture of the market, it's important to assess vendor share across different technologies, and over time. This report provides an in-depth picture of major global instrumentation companies, how they stack up against each other, how they participate in the market, and where they are gaining and losing share.	10/19/19	\$10,000
19-009	 The 2019 Purification & Filtration Instrumentation Market The purification of air, liquids and solids is an important phase in virtually all manufacturing industries and is intrinsically linked to analytical testing. This report explores how and where various purification and filtration technologies are employed and their relationship to the analytical instruments that measure for impurities with the results segmented by application, market segment and region.	9/19/19	\$12,000
19-051	  2019 Next Generation Sequencing Sample Preparation Markets An in-depth analysis of the major technologies and products critical in each step of NGS sample prep, namely nucleic acid preparation, fragmentation, and library preparation and target enrichment. This report examines the total NGS sample prep market, including both research laboratory use and clinical use, and provides forecasts for demand over the next five years, segmented by product type, industry, region, and application.	9/19/19	\$10,000

ANALYTICAL INSTRUMENTATION

REPORT #	TITLE	PUBLICATION DATE	CORPORATE LICENSE PRICE
19-008	 The 2019 Southeast Asia Analytical Instrument Market Southeast Asia represents one of the most promising regions where analytical instrument manufacturers will find growth opportunities. With a fast growing population and rising economic levels, the region has become a beacon for a wide variety of industries that rely on analytical instrumentation including biopharmaceutical manufacturing, energy exploration and production, chemicals and food safety.	8/19/19	\$12,000
19-089	 The 2019 Market for Clinical Mass Spectrometry This report examines both clinical research and clinical diagnostics labs, looking at how mass spectrometry has been implemented into application areas such as toxicology, therapeutic drug monitoring, microbial identification, vitamin D quantitation, newborn screening, and more. Contains market size, five-year growth rate, vendor share, and commentary for select mass spec technologies in the clinical market, including GC/MS, LC/MS-MS, Q-TOF LC/MS, FT/MS & Ion Trap, and ICP-MS. For the overall market, demand by region and application category is also included. The report also contains news timelines for IVD approvals of mass spec products, new system introductions, supplier collaborations, and an updated list of select clinical MS products in the marketplace.	8/4/19	\$6,000
19-003	 The 2019 Market for Analytical Instruments Used in Oil and Gas Testing The oil & gas industry represents one of the most important and complex industrial segments in the market for analytical instrumentation. In addition to background information to help make sense of this complicated industry, the report provides reliable market data on the size, growth, and character of specific analytical technologies, focusing specifically on oil & gas applications.	6/19/19	\$12,000
19-005	 The 2019 Market for Portable Instrumentation Portable analytical instruments are lightweight instruments designed to bring “the lab to the sample” and are finding more applications in agriculture, environmental testing, security and wherever analysis in the field is required. The increasing technological sophistication of portable instrumentation is opening new opportunities in areas as diverse as Near Infrared (NIR) spectrometers, X-Ray Fluorescence (XRF) Spectrometers X-Ray Diffractometers (XRD), Raman Spectrometers, Infrared (IR) Spectrometers and Mass Spectrometry (MS).	6/19/19	\$10,000
19-006	 The 2019 Laboratory Software Market Many labs are challenged to collect, analyze, interpret and store the enormous volume of data generated by analytical instruments and the increasing use of automation. Both instrumentation manufacturers and independent software vendors are competing to develop solutions to optimize experimental design, increase efficiency through integration with other systems, reduce errors and ensure regulatory compliance. Types of software included in the report are LIMS, ELN, SDMS, CDS, and MSS.	6/19/19	\$12,000
19-004	 European Analytical Instrument Market With its large and diverse economy, Europe remains a key market for analytical instrument manufacturers. This report examines economic and political developments affecting the market while providing detailed information on the size, share and growth of multiple individual categories of instruments. Important competitive activities are described and includes an end-user survey to identify effective sales strategies that can grow market share in this important region.	5/19/19	\$12,000

19-013	 The 2019 Market for Live Cell Imaging Products Live cell imaging is the study of living cells using time-lapse microscopy and an increasingly popular technique for understanding cellular dynamics. Live cell imaging relies upon microscopes, cell analyzers, and image-capture devices and a wide variety of kits and consumables.	12/19/19	\$10,000
19-088	 CAR-T 2019 Cell therapies have demonstrated surprising effectiveness, interest and market potential. This report details the current top pharmaceutical company activities in CAR-T cell therapy, as well as promising start-up players. This report details products on the market and future outlook.	12/19/19	\$8,000
19-059	 The 2019 Exome Sequencing Market With its ability to detect the protein-coding parts of the genome, exome sequencing remains an important application sector within the sequencing market. However, the application is threatened by other technologies. Kalorama looks at the current market situation and future prospects for WES.	11/19/19	\$8,000
19-011	 Instrumentation Companies Market Shares and Analysis Report One of the most important ways of viewing the marketplace, both for market participants and for external investors and other observers, is through the competitive situation. To get a complete picture of the market, it's important to assess vendor share across different technologies, and over time. This report provides an in-depth picture of major global instrumentation companies, how they stack up against each other, how they participate in the market, and where they are gaining and losing share.	10/19/19	\$10,000
19-051	  2019 Next Generation Sequencing Sample Preparation Markets This report provides a strategic perspective on the current situation and projected potential for preparative chromatography, extraction techniques, digestion, and other techniques. Includes both market size and growth data in addition to survey data from current users and buyers.	9/19/19	\$10,000
19-008	 The 2019 Southeast Asia Analytical Instrument Market Southeast Asia represents one of the most promising regions where analytical instrument manufacturers will find growth opportunities. With a fast growing population and rising economic levels, the region has become a beacon for a wide variety of industries that rely on analytical instrumentation including biopharmaceutical manufacturing, energy exploration and production, chemicals and food safety.	8/19/19	\$12,000
19-018	 2019 Life Science Customer Experience Survey and Rankings Providing an exceptional customer experience is essential in the competitive life science market. This annual report benchmarks the performance of 26 leading brands and how they compare to one another across 21 customer touchpoints.	8/19/19	\$6,000

LIFE SCIENCE

REPORT #	TITLE	PUBLICATION DATE	CORPORATE LICENSE PRICE
19-045	 The 2019 Next-Generation Sequencing Market and Survey of End Users This report combines both comprehensive global market information and voice-of-the-consumer data from a survey of 70 laboratories. Market data includes NGS sequencing revenues — with breakouts for systems and consumables — segmented by product type, region, and more. Vendors shares and installed base of systems are also provided. Survey data includes application usage, product and supplier preferences and evaluations, future lab purchase plans, and more.	7/19/19	\$12,000
19-006	 The 2019 Laboratory Software Market Many labs are challenged to collect, analyze, interpret and store the enormous volume of data generated by analytical instruments and the increasing use of automation. Both instrumentation manufacturers and independent software vendors are competing to develop solutions to optimize experimental design, increase efficiency through integration with other systems, reduce errors and ensure regulatory compliance. Types of software included in the report are LIMS, ELN, SDMS, CDS, and MSS.	6/19/19	\$12,000
19-004	 European Analytical Instrument Market With its large and diverse economy, Europe remains a key market for analytical instrument manufacturers. This report examines economic and political developments affecting the market while providing detailed information on the size, share and growth of multiple individual categories of instruments. Important competitive activities are described and includes an end-user survey to identify effective sales strategies that can grow market share in this important region.	5/19/19	\$12,000
19-015	 Customer Service and Technical Support for Life Science Products This primary research report outlines scientists' experiences in regards to complaint resolution, channels selected to communicate problems (e.g., telephone, website complaint forms, live chat, non-vendor online resources etc.) and degree of satisfaction with a variety of help-desk, call center and online service attributes.	5/19/20	\$5,000
19-016	 Life Science Customer Purchasing Journey Scientists are surrounded by a vast amount of online product information that results in constantly changing product choices, decision criteria, and buying triggers. This report explores how scientists arrive at a purchase decision and how vendors can better inform and influence them.	5/19/19	\$7,500
19-014	 Digital Marketing to Life Scientists: Social Media, Email and Smart Tech. This report provides a tactical guide for harnessing the power of the Internet to reach out to customers in a meaningful way. The report identifies where (and how) scientists spend their time on social media platforms, their views on sponsored content and targeted ads, and how they rely on supplier email outreach to inform their buying decisions.	3/19/19	\$7,500
19-001	 2019 SDi Global Assessment Report The “gold standard” of market research in the analytical and life science industries. This report features detailed market analysis and growth rates for over 80 instruments in ten technology categories. Each instrument technique includes data and discussion of market segmentation by product, industry, function, and region. This is the one report relied upon by every major analytical instrument manufacturer.	2/19/19	\$18,000

18-006	 2018 Sample Preparation Techniques and Instruments Market Analysis and Perspectives This report provides a strategic perspective on the current situation and projected potential for preparative chromatography, extraction techniques, digestion, and other techniques. Includes both market size and growth data in addition to survey data from current users and buyers. *Individual sections available for \$5,500	6/1/18	\$12,000
18-012	 Life Science Conference and Exhibit Strategies: What's Working Now Based on a survey of more than 1,100 life scientists, this report is the perfect guide for both suppliers and conference organizers. For suppliers, it provides information on the most popular annual meetings, the most effective booth strategies, and more. For organizers, this report provides valuable information on what attendees look for in "the perfect conference", opinions about most major conferences, and how different factors impact the quality of their experience and propensity to return in future years.	6/1/18	\$6,500
18-003	 The Mass Spectrometry Market Analysis and Perspectives The market for mass spectrometry is growing due to advances in technology that are making it easier to go from "sample to result," leading to wider adoption in applications such as food safety and clinical diagnostics. This report covers the size and growth of the markets for single quadrupole LC-MS, tandem quadrupole LCMS, GC-MS, TOF LC-MS, ICP-MS, and MALDI-TOF MS. It also includes detailed survey results from current instrument users and buyers.	5/1/18	\$10,000
18-042	 Next Generation Sequencing Market by Product Type (Instrumentation, Consumables, Services), Application (Research, Clinical), by Method (Sanger, Next-Generation) and by Geographic Region Provides an in-depth look at the sequencing market, including the world NGS sequencing and Sanger sequencing technologies markets for 2016-2022 and the world NGS market for services, instruments, and consumables for 2016-2022. The report also provides financial trends by geographic regions, breaking down the world 2016-2022 NGS market by United States, Europe, Asia/Pacific, and rest of world segments. Examination of the research segment versus the clinical use segment and a breakdown of the current clinical sequencing market by disease category are also provided.	4/16/18	\$9,000
18-017	 The 2018 Market For Real-Time PCR Products (An Interactive Report) This report is based on a survey of over 1,000 life scientists on real-time PCR, examining brand loyalty, product performance, vendor satisfaction, likelihood to switch suppliers, but also includes data on market size, growth, and vendor shares.	4/1/18	\$3,000
18-043	 PCR Markets for Life Sciences Applications (Market by Type - qPCR, dPCR - Application - Pharmaceutical, General Research, and by Country and Region) Including instruments, reagents, other consumables and software and services related to instruments, the market exceeds \$2 billion dollars. This report covers the competition from next generation sequencing for a number of applications.	3/2/18	\$7,990
18-044	 The Market and Potential for CRISPR/Cas9 Gene Editing This report provides a current review of what is happening with these technologies and what revenues can be expected. This report consolidates the information and trends and provides reliable market estimates for CRISPR technology to 2023.	2/5/18	\$8,400

20-027	 Kalorama Molecular Diagnostics Datastream March and October 2020 - Kalorama KNOWLEDGE CENTER subscribers get updated assessment of MDx cancer, inherited, transplant, infectious disease and other markets, along with biomarker developments and new reimbursement activities.	4/1/20	With Subscription to Diagnostics Only
20-031	 Hematology (Lab-based and Decentralized Markets) Hematology is exploding with the advent of decentralized technologies and demographic changes. Market data from even a year ago is no longer sufficient. Kalorama's report looks at the market testing for WBCs and other important tests, provided competitive analysis and corporate profiling.	5/5/20	\$11,000
20-032	 Immuno-Oncology Market and Pipeline Review Cancer survival has been completely changed by new therapies. New understanding of the disease and treatment options are changing the landscape. Kalorama looks at the major drugs in oncology and conducts a pipeline review of 25 top company offerings.	5/15/20	\$14,000
20-033	 Molecular Diagnostic Infectious Disease Testing, 4th Edition Infectious disease is one of the fastest-growth areas in IVD, and also is a large market pool to compete for. This report looks at PCR, LAMP, NEAR, NGS, MS and other tools in this space. It examines both traditional microbiology, syndromic approaches and pathogen-targeted testing.	5/15/20	\$11,000
20-036	 The Market for Mass Spectrometry in Clinical Applications Mass spectrometry has emerged as a significant technology in diagnostics. Expertise is required to sort out where it figures in to competition and market share. This is the definitive report for clinical mass spectrometry. Market share for MS clinical applications, and market breakout percentages by type of MS are provided.	6/1/20	\$8,000
20-038	 Infectious Disease Immunoassay Testing While molecular technologies are an important part of microbiology testing, immunoassays have also prospered. Today's immunoassays come in many forms, lab-based, large workstation analyzer or point-of-care. They have IT features and enhanced sensitivity that can lead to better results.	6/15/20	\$11,000
20-040	 IVD Mergers and Acquisitions IVD requires mixing and matching of the skills of various companies due to the increasing complexity of tests. Every year, Kalorama tracks the M&A activity in in vitro diagnostics.	7/5/20	\$3,000
20-041	 Direct to Consumer Testing Market (Routine and Genetic) Testing without a physician order was once unheard of. Now, most major laboratory services offer patient-directed testing. At the same time, companies such as 23andMe, Color Genomics and Ancestry are marketing to consumers. What is the status of DTC testing, and what is the 5 year forecast. Who are the main players? This report provides the answers.	7/5/20	\$8,000

20-042	 Molecular Diagnostics for Transplantation Proper transplantation requires testing to determine immunocompatibility. This is a high-revenue growth area and the target of product development efforts. Kalorama looks at the products, company market share and long-term growth in this market.	7/10/20	\$11,000
20-044	 Emerging Infectious Diseases DX (Ebola, Chagas, Marburg, WNV, Others) Infectious diseases do not remain static, and thus no business planning effort is complete without addressing the possible new threats to the market. Zika and Ebola cases in the United States, unheard of a decade ago, are simply a reminder of perpetual vigilance and testing needed, along with the instruments and kits to complete this task.	7/15/20	\$11,000
20-045	 Benchmarking for 2020 - The Clinical Diagnostics Customer Experience How did your company compare to the industry average at various customer touchpoints? The full report contains detailed profiles and comparisons of 21 leading suppliers. In addition, a companion interactive report gives you the ability to filter the data by company, market segment, region and touchpoint to conduct your own analysis and presentations.	8/5/20	\$11,000

GLOBAL REPORT

20-050	 The Worldwide Market for In Vitro Diagnostics, 13th Edition This is the most comprehensive report created for the market for in vitro diagnostics, used by a majority of the top IVD firms and many other instrument vendors and reagent suppliers for accurate business planning. The report covers the global market for clinical chemistry, immunoassays, hematology, coagulation, blood banking, infectious disease, histology/cytology and molecular approaches, including subsets of testing within them. Over 2,000 pages of market analysis and corporate profile provide readers an entire market picture, including market performance and profiles of top companies.	8/20/20	\$18,000
20-047	 Lab-Developed Tests Market, 3rd Edition There is no other resource to equal Kalorama's coverage of the lab-developed test market. This report provides sizing and estimate for both the LDT services market, and the IVD markets (supplies, instruments, reagents) used for LDT purposes. The result of interviews with vendors and end-users, rigorous examination of company financials and trade reporting. Regulatory activity in 2020 and the impact on the market is part of the considered analysis.	9/1/20	\$11,000
20-049	 Biomarkers 2020 Biomarkers are an essential part of CDx, cardiac, infectious disease, diabetes and other markets for the detections of conditions. Troponin, PCT, CRP, PSA, HER, EGFR, miRNAs auto-immune and possible brain trauma and depression biomarkers are among those covered. This report provides market assessments at the biomarker level for companies conducting business planning. Where appropriate, POC and lab-based breakouts are provided. Regional reporting is included.	9/15/20	\$11,000

19-056	 IVD Market Trends Summary This report captures the patterns in product launches and customer trends in the in vitro diagnostics markets.	11/19/19	\$4,000
19-054	 The 2019 Market for hbA1c Testing The market defined for one of the highest-revenue growth tests This report looks at analyzer and point-of-care markets and market share for this essential biomarker in the detection and treatment of diabetes. Forecasts to 2024.	10/1/19	\$10,000
19-052	 IVD Procedure Volumes 2019 This report estimates and projects the test procedures performed in the United States and in several countries and regions. Procedures for molecular tests, immunoassay tests, microbiology, point of care and histology are included, among others.	9/19/19	\$10,000
19-050	 The Worldwide Market for In Vitro Diagnostics, 12th Edition The "Bible of the IVD Industry," this report has been updated for two decades. The report analyzes every aspect of in vitro diagnostics testing, including clinical chemistry, immunoassays, hematology, point-of-care and other areas, profiling hundreds of companies and detailing new trends in the market. The 2,000+ page report provides 2019 market sizing and forecasts to 2024.	8/19/19	\$16,000

DIAGNOSTICS

REPORT #	TITLE	PUBLICATION DATE	CORPORATE LICENSE PRICE
19-017	 2019 IVD Customer Experience Survey Based on a survey of more than 300 clinical lab professionals, this interactive report examines 20 of the largest vendors in the clinical diagnostics market. Each supplier is scored on a variety of touchpoints representing each stage of the custom experience from pre-purchase, to product experience, through post-purchase support. Results can be filtered by region, customer segment, and more. Customer verbatims are also included to give more rich detail into the perspectives given for each supplier measured.	7/19/19	\$7,500
19-044	 The 2019 Biomarkers Market Specific tumor, cardiac and other biomarker markets are estimated for five years out in this market report.	7/19/19	\$10,000
19-046	 The 2019 Market for Molecular Diagnostics for Infectious Disease PCR is the gold standard for several important disease categories. This report estimates market for molecular technologies used to test for microorganism threats.	7/19/19	\$9,000
19-041	 The World Market for Molecular Diagnostics, 8th Edition The market for PCR tests, non-PCR NAAT, sequencing and other testing. This report analyzes molecular assays used in cancer testing, infectious disease, inherited disease and blood testing.	6/19/19	\$10,000
19-043	 IVD Mergers and Acquisitions IVD is an industry with a highly active M&A space. This report details recent transactions and the opportunity for companies to partner and merge to reinforce capabilities and gain new technologies.	6/19/19	\$4,000
19-038	 Liquid Biopsy Market, Company Rankings and Forecast The current trends and market potential for liquid biopsy systems, including CTCs and ctDNA -based approaches. Discussion of current practice trends and limitations/challenges, as well as innovative approaches are included.	5/19/19	\$11,000
19-085	 Syndromic Testing Market Update It has been thought that numerous pathogens tested directly from clinical specimens could change up diagnostics, and many vendors have responded by producing syndromic multiplex panels with considerable capabilities. These single tests, designed to detect a number of organisms that might have caused a particular syndrome, are aimed at positively influencing decisions regarding patient management, infection control, and antimicrobial prescription decisions. On a more fundamental level- they can produce better test results, as they tend to find infections at a greater rate. This report provides data on the market for syndromic tests for the following segments: GI, respiratory, HAI, and others, as well as company profiles.	5/19/19	\$6,000
19-030	 Infectious Disease Diagnostics: World Market Analysis This large-scope report has markets for several infectious disease testing categories including Hep, HIV, TORCH, malaria, respiratory categories, rapid micro and traditional microbiology. Markets are included for more than 20 countries.	4/19/19	\$11,000
19-033	 Sexually Transmitted Disease Testing This report provides detailed market breakouts and forecast for several categories, including CT/ NG, HIV, TV, BV and other categories for lab tests and point of care approaches.	4/19/19	\$9,000

KLI15723 325	 Kalorama Information The IVD Market in the Middle East Many Middle Eastern countries, such as Saudi Arabia, have identified investment in healthcare infrastructure as a priority. The focus is on the IVD discipline including reagents, consumables, calibrators and controls of: clinical chemistry, immunoassays, microbiology and molecular testing, POC Testing, Histology, Cytology through 2022 in the Middle East.	7/5/18	\$7,990
KLI15702 503	 Kalorama Information Prenatal and Newborn Genetic Screening and Testing Markets (by Application [Carrier Testing, Prenatal Screening, Newborn Testing, Newborn Screening], by Type [Services, Kits] by Geographic Region) While many discoveries have been made about the causes of genetic disorders, there remains much more to learn before many of these discoveries can be used as clinical tests – but progress is also being made on this front. While potential causes of inherited disorders are still often evaluated on a gene by gene basis, technology advances such as chromosomal microarrays and DNA sequencing are making it possible to test panels to detect mutations associated with many different disorders in a single test.	6/5/18	\$7,990
KLI15654 332	 Kalorama Information IVD in China In 2017, the IVD market in China was estimated at \$3,200 million. The fast pace of market growth is expected to continue. The country and its healthcare system are confronted by challenges shared by less developed countries, but also burdens common among developed middle-income and affluent countries such as diabetes amongst others.	4/12/18	\$7,990
KLI15652 532	 Kalorama Information The Worldwide Microbiology Market (Traditional Microbiology, Microbiology/Infectious Disease Immunoassays, Molecular Microbiology, Mass Spectrometry in Microbiology) The Worldwide Microbiology Market provides analysis of the current global market, looking at the current and future market by segment, by pathogen/disease, by geographic region, and by major company market shares.	4/10/18	\$9,000
KLI15633 203	 Kalorama Information The Market for In Vitro Diagnostic Test Contract Manufacturing (OEM) In vitro diagnostics markets rely on outsourcing to complete products needed to fulfill demand for clinical tests. The report provides market projections and examines the companies that build IVD devices, reagents, antibodies, and other accessories for major IVD companies.	3/20/18	\$7,990
KLI15644 644	 Kalorama Information Point of Care Diagnostics Market in Retail Clinics (Cholesterol, Diabetes, Influenza, Other Tests) Retail clinics are becoming relatively large users of point-of-care (POC) tests, clinical chemistry and immunoassay laboratory tests and vaccines. This chapter examines the effect of retail clinics on each of these three supplier market segments. This report provides Point of Care, Clinical Chemistry and Immunoassay sales to retail clinics. Vaccines are also included.	3/28/18	\$3,000
KLI15643 712	 Kalorama Information Mergers and Acquisitions in the IVD Market Many of these transactions occur cross-border, particularly with U.S. and European companies seeking to enter Asia and involve the acquisition of specific product lines or business units. Kalorama Information looks at market transactions in Mergers and Acquisitions in the IVD Market, recording over 220 acquisitions in the diagnostics industry from 2015 to March 2018.	3/27/18	\$1,990

KLI15640 228	 Point of Care (POC) Infectious Disease Diagnostic Testing Market Hospital acquired infections, like Methicillin-resistant Staphylococcus aureus (MRSA), necessitate increased testing. This report, Point of Care Infectious Disease Diagnostic Testing provides market sizing and forecasts for the following disease areas: Influenza, STD, HIV, Hepatitis, Malaria, C. difficile, E. coli, H. pylori, Home Test/OTC.	3/22/18	\$5,995
KLI15639 257	 Point-of-Care Glucose Monitoring Market: World Market Analysis This report provides market estimates and forecasts for point-of-care glucose testing. Information in this report is from the latest published figures for companies participating in the market as well as recent interviews. Market analysis for Global POC Glucose testing, blood glucose testing, POC glucose self-testing, POC glucose professional testing and more.	3/21/18	\$3,000
KLI15618 801	 PCR Markets for Life Sciences Applications (Market by Type - qPCR, dPCR - Application - Pharmaceutical, General Research, and by Country and Region) Including instruments, reagents, other consumables and software and services related to instruments, the market exceeds \$2 billion dollars. This report covers the competition from next generation sequencing for a number of applications.	3/2/18	\$7,990
KLI15607 995	 Infectious Disease Diagnostic Testing: World Market Analysis of TB, Flu, HIV, Hepatitis, Strep A, Malaria, HPV, Blood Screening, STDs, ID/AST, HAI, Rapids and Other Test Products Infectious disease testing offers a mix of some mature segments with rapid spikes in market growth in the test market can occur with the emergence of new disease threats.	2/26/18	\$11,000
KLI15600 856	 The Worldwide Market for Point-of-Care (POC) Testing (Infectious Disease Testing, POC Cancer Tests, Rapid Coagulation, Urine Testing, Lipid Tests, Pregnancy Testing, Glucose Testing and Other POC) This report provides expert market coverage of over two dozen individual market segments, while describing companies in the market and major trends. It also provides an in-depth look at the global POC testing market yielded several interesting facts that are explored in this study.	2/16/18	\$7,990
KLI15582 179	 The Market and Potential for Molecular Point of Care Diagnostic Tests Existing POC diagnostics range from urinalysis dipsticks performed in physician office laboratories (POLs) through rapid infectious disease tests used to quickly diagnose admitted patients.	1/25/18	\$7,990
KLI15569 647	 The Market for Direct-to-Consumer Genetic Health Testing The growing demand for early disease detection and diagnosis, personalized medicine, importance of disease monitoring and expanded technologies shape the direct-to-consumer laboratory testing market.	1/10/18	\$7,990
KLI15566 365	 Tumor Markers Immunoassay Market (PSA, CEA, CA 125, AFP, CA 15-3, CA 19-9, CYFRA 21-1, ProGRP, SCC, CA 72-4, HE4, Others) Biomarker assays are being developed and added to the menus of large analyzers. Assays for these tumor markers are still widely marketed by a large number of companies. Many of these companies are profiled in Tumor Markers Immunoassay Market.	1/18/18	\$5,990

19-058	 Kalorama Information CAR-T 2019 Cell therapies have demonstrated surprising effectiveness, interest and market potential. This report details the current top pharmaceutical company activities in CAR-T cell therapy, as well as promising start-up players. The report details products on the market and future outlook.	12/19/19	\$8,000
19-009	 SDi The 2019 Purification & Filtration Instrumentation Market This report evaluates the global purification and filtration market along with the numerous specific techniques that compose and support them, for a total of ten different specific purification and filtration technologies. As applications of these technologies can be very broad-ranging, the overall market is categorized into industrial and laboratory purification. This report also includes an analysis of end-user perspectives based on a survey of 145 respondents across several different industries. The market analysis and survey will provide insight for vendors to innovate and implement business strategies based on current market conditions and direct feedback on customer needs.	9/19/19	\$12,000
19-047	  SDi Kalorama Information The 2019 Market Instrumentation for Pharmaceutical, Biopharmaceutical and CRO Markets This report is an in-depth examination of the major technologies used in the pharma/bio sector, encompassing 64 technologies in 10 categories. The report examines historical growth and provides forecasts for demand over the next five years. End user perspectives gained through a survey of 120 researchers in the sector provide insights into development pipelines, laboratory budgets, and the challenges being faced in therapeutics development.	8/19/19	\$10,000
19-087	 Kalorama Information Biosimilar Threats and Opportunities This report is designed to provide a snapshot of issues and trends that are affecting the biosimilar market today, along with the various strategies being used by both innovator companies and generic companies in the developing world of biosimilars. Market data on the global opportunity for biosimilars is provided along with several different market segmentations.	5/19/19	\$6,000
19-035	 Kalorama Information Targeted Cancer Therapeutics This report details current and upcoming cancer drugs that are marketed based on test guidance. The report is essential for both pharmaceutical and diagnostics companies.	4/19/19	\$10,000
19-011	 SDi Supporting The Pipeline: The Market For Instrumentation In Drug Discovery Applications This report provides the reader a detailed and accurate picture of the market size, demand growth, vendor share, and more for analytical instruments used in the drug discovery market for all phases of research and production. In addition to demand for instruments, reagents, consumables, components, and service contracts, this report also provides data on product sub-categories (for example, Chromatography systems are broken down into Analytical HPLC, Gas Chromatography, Preparative HPLC, and LPLC). To analyze the market from two different directions, this report also includes insights from a survey of scientists directly involved with drug production, research, testing, and related product purchasing. Supplier satisfaction is examined, along with future purchasing plans, lab budget changes, and more.	12/1/18	\$9,500
